

**Clyde Moore Obit**

LSU Geology Professor Emeritus Dr. Clyde H. Moore passed away in Lakewood Colorado on July 1, 2020. He was 87. Clyde received his BS degree in Geology from Louisiana State University, Baton Rouge and his MS and PhD degrees from the University of Texas in Austin. He then spent several years as a research geologist with the Shell Development Company in Houston, Texas and Ventura, California. He joined the Geology faculty at Louisiana State University in 1966 and retired as Professor Emeritus in 1997. During his tenure at LSU his research interests and the work of his students spanned all aspects of carbonate geology from modern sediments to ancient rock sequences around the world. His main focus in his later years at LSU was on the nature and evolution of porosity in carbonate reservoirs. This research was sponsored by a group of industrial associates in the LSU Applied Carbonate Research Program. He was major professor to numerous MS and PhD students who went on to distinguished careers of their own in industry and academia. After LSU Clyde became a research professor at the Colorado School of Mines in Golden, Colorado. Clyde was an active consultant, a Distinguished Lecturer for AAPG, and received an AAPG Distinguished Educator award.
